

SALES PERFORMANCE ANALYSIS

2023 – 2025

Executive Summary: Gross Performance · Net Revenue · Revenue at Risk

Prepared by Omusilwa Victor

Executive Summary

1,200

Total Gross Orders

Across All Orders Statuses

\$1.26M

Gross Revenue

2023–2025

\$488.8K

Fulfilled Revenue

38.6% of gross

\$776K

Revenue at Risk

61.4% of gross

The business generated strong gross demand but only **38.6%** was successfully converted into realized revenue.

The remaining **61.4%** is lost or at risk; a critical operational challenge.

Order Volume Comparison

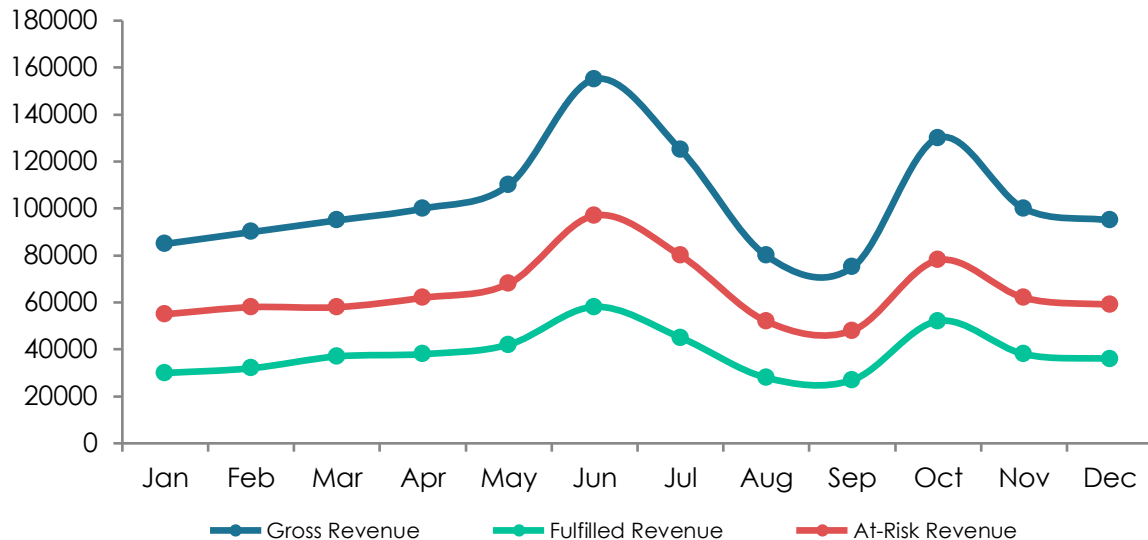

Revenue Value Comparison (\$)

- Only **38.6%** of gross revenue converts to completed sales, revealing a **61.4%** revenue gap that represents the primary growth lever.

SEASONAL & CHANNEL PERFORMANCE

Monthly Revenue Trend (Across the Channel)

June & October are peak revenue months across all order statuses.

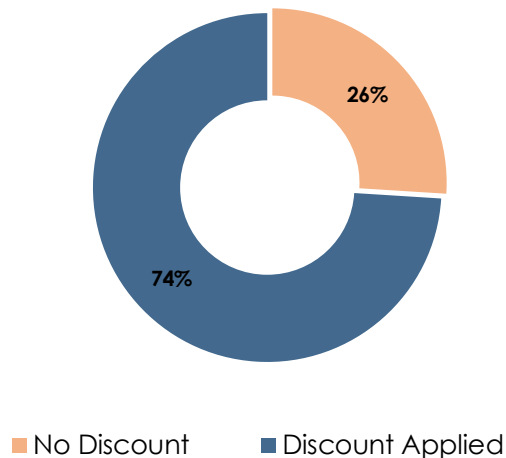

Email & Instagram consistently attract the highest-quality customers.

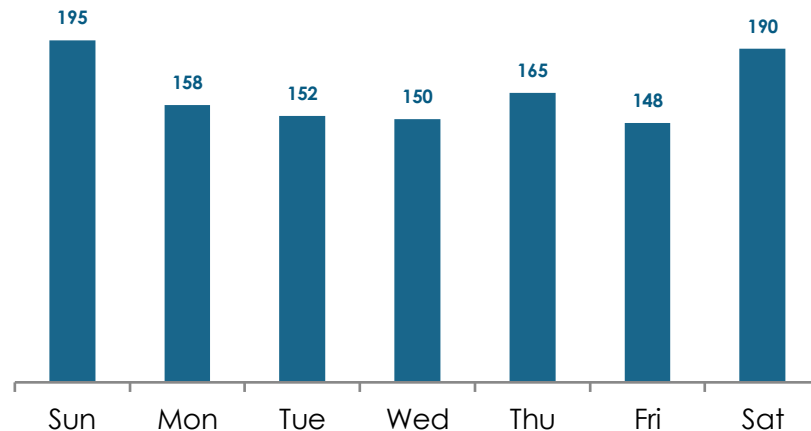

Revenue loss scales proportionally with volume indicating a systemic risk.

DISCOUNT USAGE & WEEKLY ORDER PATTERNS

Gross Order Discount Usage

Weekly Order Volume Distribution

- **74%** of orders required a discount, demonstrating a price-sensitive demand. Weekends (Sun & Sat) see the highest order volumes.

Strategic Recommendations

Key actions to unlock the \$776K revenue opportunity

Improve Fulfillment Efficiency

- Streamline order processing to reduce cancellations and pending orders.

Reduce Returns

- Enhance product quality and accurate descriptions to lower the 247 returned orders.

Convert Pending Orders

- Proactive follow-up on 237 pending orders can immediately recover delayed revenue.

Double Down on Email & Instagram

- These channels yield the best conversion; invest further in engagement and nurture flows.

Seasonal Campaigns

- Leverage June & October peaks with targeted promotions and staffing up for demand surges.

Revenue Recovery Target

- A 20-30% reduction in pipeline losses to \$155K–\$233K in recovered annual revenue.
